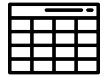
(1) Select an anchor paper from EMNLP 2023

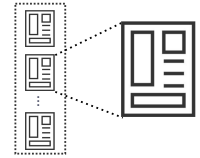
(2) Expert selects an figure/table from the anchor paper



(3) Annotate *visual context* questions from the selected figure or table

"Which model exhibits the most negative Spearman's Correlation Coefficient?"

(4) Identify a reference paper from the anchor paper's bibliography



(5) Generate *reference-based* questions from the identified reference paper

"What dataset is the base model of DialoGPT trained on?"

(6) Combine the *visual context* and *reference-based* questions

"Consider the paper that introduces the model that exhibits the most negative Spearman's Correlation Coefficient. What dataset is the base model trained on?
