
In the U.S., younger Americans are much more likely than older Americans to want a close relationship with China over Germany. For example, 58% of Americans ages 18 to 29 say it is more important for their country to have a close relationship to China than say the same about Germany (32%). But among older Americans, more say the relationship with Germany is more important than the relationship with China.

There are also slight partisan differences in the U.S. on the choice of a close relationship with Russia or Germany. About two-thirds of Democrats (66%) say they prefer close ties with Germany, compared with 57% of Republicans. And 31% of Republicans prefer close relations with Russia compared with 21% among Democrats.

Among Germans, there is far more support for a close relationship with Russia in the former East than in the former West. Nearly four-in-ten East Germans say that they prefer close ties with Russia, compared with only 23% who say the same about the U.S. And West Germans are twice as likely to prefer a close relationship with the U.S. than with Russia.

Younger Americans see relationship with China as more important than Germany

% ages ___ who say it is more important for their country to have a close relationship to ...

Note: "Both" and "Don't know" volunteer responses not shown. Older Americans were significantly more likely to volunteer "Both."

Original Question:

What is the percentage value of the first gray bar from the top?

Original Answer:

29

Error type:

Decontextulization-required Question

Comment:

The questions in ChartQA are dependent on a single chart, see the description like *the first gray bar from the top*. We shall rephrase (decontextulize) the question to make it a document-level one.

Revised Question:

What is the percentage value of west Germany respondents viewing Germany's relationship with the United States as important as its relationship with Russia?

Revised Answer:

29
