

Essentials

Manage Audio Playback in Audio Control Panel

When multiple audio apps (such as **Music**) are opened, you can manage music playback and switch between these apps in Audio Control Panel with ease.

1 After opening multiple audio apps, swipe down from the upper right edge of the phone to display **Control Panel**, then touch the audio playback card at the top of **Control Panel**.

2 The currently and recently used audio apps will be displayed in Audio Control Panel where you can manage playback (such as playing, pausing, and switching to the previous or next song) in the app in use, or touch another audio app to quickly switch playback.

- Some apps need to be updated to the latest version before using this feature.
- Not all apps support Audio Control Panel.

Quickly Switch Audio Playback Device

When your phone is connected to an audio device (such as a headset, Bluetooth speaker, or Vision product), you can quickly switch the playback device in the audio control section in **Control Panel** (such as for transferring the current music playback from your phone to a Bluetooth speaker).

1 Connect your phone to an audio device via Bluetooth or other methods.
After a Vision product is connected to your phone via Bluetooth, you can also connect it to the same Wi-Fi network and log in to the same **HUAWEI ID** as your phone to perform more operations.

2 Swipe down from the upper right edge of your phone to display **Control Panel**, touch or the device icon (such as) in the top right corner of the audio control section at the top, then select the audio device from the connected device list to transfer the current audio playback on your phone to the device.

Work Seamlessly Across Devices with Device+

Device+ allows for collaboration between different devices, making your phone the hub of your nearby Vision and other supported devices for them to be controlled conveniently. You can also seamlessly transfer ongoing tasks on your phone, from MeeTime calls to audio and video content being streamed, to your Vision with just a tap.

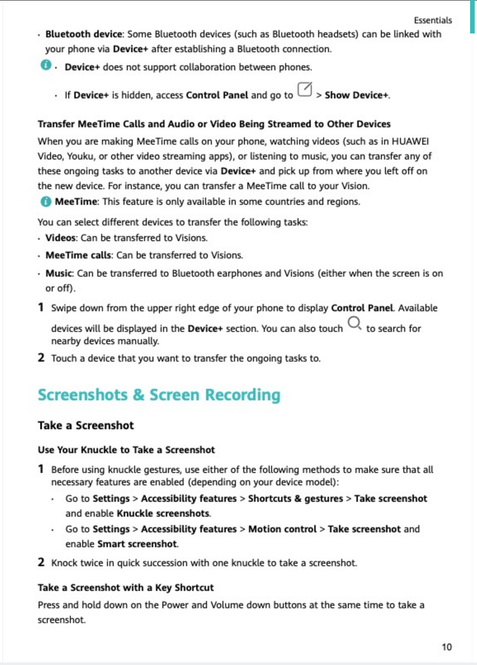
Please make sure your device has been updated to the latest system version.

Set Device+

Currently, **Device+** supports linking phones with the following types of devices. To use this feature, make sure that devices to be connected support **Device+**. Before you get started, enable Bluetooth and Wi-Fi and log in to your HUAWEI ID on your phone. For other devices, perform the following settings:

- **Vision**: Ensure that it is connected to the same LAN and logged in to the same HUAWEI ID as your phone.

9



Essentials

- **Bluetooth device**: Some Bluetooth devices (such as Bluetooth headsets) can be linked with your phone via **Device+** after establishing a Bluetooth connection.
- **Device+** does not support collaboration between phones.
- If **Device+** is hidden, access **Control Panel** and go to > **Show Device+**.

Transfer MeeTime Calls and Audio or Video Being Streamed to Other Devices

When you are making MeeTime calls on your phone, watching videos (such as in HUAWEI Video, Youku, or other video streaming apps), or listening to music, you can transfer any of these ongoing tasks to another device via **Device+** and pick up from where you left off on the new device. For instance, you can transfer a MeeTime call to your Vision.

MeeTime: This feature is only available in some countries and regions.

You can select different devices to transfer the following tasks:

- **Videos**: Can be transferred to Visions.
- **MeeTime calls**: Can be transferred to Visions.
- **Music**: Can be transferred to Bluetooth earphones and Visions (either when the screen is on or off).

1 Swipe down from the upper right edge of your phone to display **Control Panel**. Available devices will be displayed in the **Device+** section. You can also touch to search for nearby devices manually.

2 Touch a device that you want to transfer the ongoing tasks to.

Screenshots & Screen Recording

Take a Screenshot

Use Your Knuckle to Take a Screenshot

1 Before using knuckle gestures, use either of the following methods to make sure that all necessary features are enabled (depending on your device model):

- Go to **Settings** > **Accessibility features** > **Shortcuts & gestures** > **Take screenshot** and enable **Knuckle screenshots**.
- Go to **Settings** > **Accessibility features** > **Motion control** > **Take screenshot** and enable **Smart screenshot**.

2 Knock twice in quick succession with one knuckle to take a screenshot.

Take a Screenshot with a Key Shortcut

Press and hold down on the Power and Volume down buttons at the same time to take a screenshot.

Question: What devices other than phone are introduced for setting device+?
Reference Answer: 1.Vision 2.Bluetooth devices

GPT-4o ✅

Answer: Other than phones, the devices introduced for setting Device+ in the Huawei Nova Y70 User Guide include:
1. **Vision**: Ensure that it is connected to the same LAN and logged in to the same HUAWEI ID as your phone.
2. **Bluetooth devices**: Some Bluetooth devices (such as Bluetooth headsets) can be linked with your phone via Device+ after establishing a Bluetooth connection.
These devices can be linked to your phone to enable seamless collaboration and task transfer

GPT-4V ❌

Answer: The images you provided are pages from the user guide for the Huawei Nova Y70 smartphone. This guide includes detailed instructions on various features and settings of the device, such as basic gestures, camera usage, app management, and settings adjustments. If you have specific questions about any of the features or need further details on how to use the device, feel free to ask!

Gemini-1.5-Pro ❌

Answer: The document you provided is a user guide for the Huawei nova Y70 phone and it doesn't contain information on "device+". Therefore, I can't answer your question.

InternVL-v1.5 ❌

Answer: The devices introduced for setting device+ are Bluetooth devices, such as Bluetooth headphones, and other devices that support Bluetooth.

OCR + GPT-4 ✅

Answer: The devices other than phones that are introduced for setting up Device+ include:
1. **Vision**: This refers to devices like smart TVs or displays that can be linked with your phone for a seamless multi-device experience.
2. **Bluetooth devices**: Such as Bluetooth headsets, which can be connected to your phone via Device+ for audio streaming or calls.
These devices can be controlled and interacted with through your phone, allowing for tasks like transferring MeeTime calls, audio, or video content to your Vision device, or managing audio playback through connected Bluetooth devices.

OCR + Mixtral-8x22B ✅

Answer: For setting Device+, ensure that devices to be connected support Device+. Before you get started, enable Bluetooth and Wi-Fi and log in to your HUAWEI ID on your phone. For other devices, perform the following settings:
+ Vision: Ensure that it is connected to the same LAN and logged in to the same HUAWEI ID as your phone.
+ Bluetooth device: Some Bluetooth devices (such as Bluetooth headsets) can be linked with your phone via Device+ after establishing a Bluetooth connection.
@ Device+ does not support collaboration between phones.
If Device+ is hidden, access Control Panel and go to > Show Device+.
