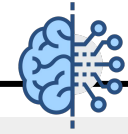
TS 24.501 Section 5.3.1.3

upon receipt of a message of a network-initiated 5GMM common procedure, the UE shall stop timer T3540 and respond to the network-initiated 5GMM common procedure via the existing N1 NAS signalling connection as specified in subclause 5.4



SCA Node 2037 (Derived from TS 24.501 Section 5.3.1.3)

Start State: UE has an active N1 NAS signalling connection and timer T3540 is running.

Condition: Receipt of a message for a network-initiated 5GMM common procedure.

Action: UE stops timer T3540 **and** responds to the network-initiated 5GMM common procedure using the existing N1 NAS signalling connection as specified in subclause 5.4.

End State: Timer T3540 is stopped, and the UE has responded to the network-initiated 5GMM common procedure via the N1 NAS signalling connection.
