Spatial Memory

Case 1 (Failure)

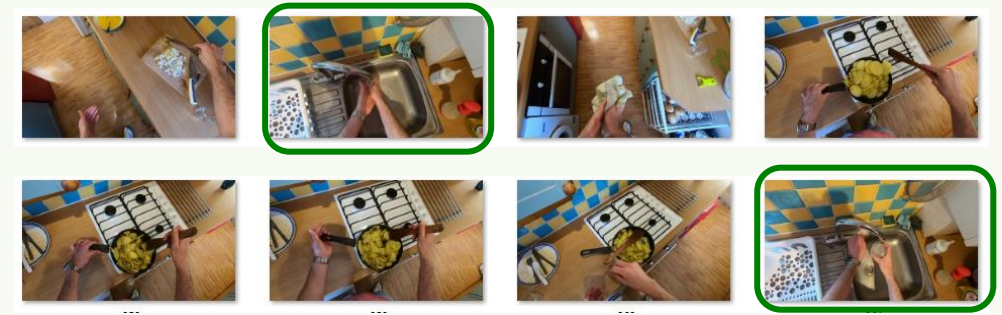
Question: After pouring the boiling water into the cup, where does he place the teapot?

A. To the right of its original cooking position on the stovetop (from his perspective)
B. On the counter, not on the stovetop." The stream passes through the intact sidewall of the glass
C. Back on the stovetop, above the original cooking position
D. Back on the stovetop in the original cooking position

GPT-5 answer: C ✗
GT answer: A

GPT-5 self-explanation: *The teapot was originally boiling on the front-right burner. After he pours the water into the cup, he places the teapot on the back-right burner (the burner directly above the original position)*

Case 2 (Success)



Question: How many times did the person used faucet water?

A. One
B. Two
C. Never
D. Four

GPT-5 answer: B ✓
GT answer: B

GPT-5 self-explanation: *The person uses the faucet twice—first to wash their hands at the sink, and later to fill a glass with water*
